

Stormwater Is Everybody's Business

Stormwater picks up debris, chemicals, dirt, manure and other pollutants as it flows over surfaces such as driveways, roads and lawns. Without proper stormwater management, this polluted runoff flows untreated into our streams, rivers and wetlands.

Polluted stormwater runoff is the greatest threat to clean water!

Residents, municipalities, businesses and developers need to work together to decrease stormwater runoff and increase stormwater infiltration.

Our streams and rivers supply

- Water for drinking
- Water for fishing
- Water for swimming
- Water for canoeing and boating
- Water for wildlife
